

Kay's Kamp 2022 COVID Safety Requirements

Before beginning the application for Kay's Kamp 2022, we want to make you aware of the medical protocols in place for this year. These criteria listed below are the result of the ongoing COVID 19 pandemic and is in accordance with the safety standards of the Centers for Disease Control (CDC) and our accrediting organizations, American Camp Association (ACA) and Children's Oncology Camping Association (COCA). Recognizing that our kamper's immune systems may not be as strong as others, the Kay's Kamp Medical Committee led by Dr. Trisha Jordan, have established the following requirements for Kamp this year:

- Kampers age 5-17 **must be** vaccinated, with a minimum of two doses, against COVID-19. A booster dose is also required for Kampers age 12 or greater who are eligible
- Kampers and staff 18 years and older, **must be fully vaccinated** including 2 doses and booster.
- All Kamp participants (kampers and staff) will be required to obtain a negative PCR test 24-48 hours prior to arriving at the kamp site.
- Kampers and staff will be tested for COVID upon arrival to Kamp
- Additional testing will take place throughout the weekend.
- All participants will be required to wear a mask while indoors unless actively eating or drinking.
- If a kamper demonstrates COVID-19 symptoms and/or tests positive, parents will be asked to pick up the child within 2 hours of notification.

Our goal, as always, is to provide a kamp session of fun activities while maintaining our high safety standards. If you have any questions regarding the safety requirements for this year, please contact our Kamper Family Liaison Katie Foster at Katie@kayskamp.org or our Medical Coordination Director, Dr. Mary Ellen McKnight at memcknight@kaysfdn.org.
